

**City of Seattle chooses
Whizible Initiatives to collate, prioritize
and manage their IT initiatives**

Pune, India – 1st March 2008:

Compulink Systems Limited announced today that the City of Seattle has chosen Whizible Initiatives for managing their initiatives.

Vishwas Mahajan, CEO of Compulink said, "We are honoured to work with the City of Seattle, given that the City is a national leader in its use of technology to inform and engage citizens in governmental affairs. We are sure that Whizible Initiatives will prove to be an asset in this endeavor."

Whizible Initiatives enables organizations to manage their initiatives and in-house and outsourced projects through effective priority management & progress measurement to achieve operational excellence

The Department of Information Technology, or DoIT, is responsible for providing technology services and policy planning for their customers, Seattle's citizens and City of Seattle departments and employees.

DoIT manages the City's information technology infrastructure and performs strategic IT planning. DoIT coordinates strategic technology direction for the City, developing common standards, architectures, and business solutions to deliver City services more efficiently and effectively. It also builds and operates the City's corporate communications and computing assets, which include the City's telephone, radio and email systems, networks and servers. DoIT oversees development of the Democracy Portal, a project to improve the City of Seattle's government access television station and its accompanying web site by providing new programming, live Web streaming of City Council meetings, live 'webcasting' and interactive services that make it easier for citizens to access government information and decision makers.
